# New Features in Trackit Plus v2.8.4.7

FILE MANAGER

File Manager

At the end of a recording, the File Manager window and dialogue is displayed.

The File Manager automatically collects all the relevant associated files for a study and assembles them into appropriate folders on the PC. This makes it much easier for local review and/or the upload of files for remote review to take place.

File Manager works for the following recording types:

Amplifier Recordings

- Ambulatory (amplifier) recordings with video

Dual Recordings

- Dual recordings with or without video

File Manager (continued)

## File Manager automatically assembles files on the PC as follows:

- **Ambulatory folder**,
  e.g. SmithJoh_220311134555

  The File Manager assembles the ambulatory files,
  Events files and all video and synchronization
 files in this folder.

Amplifier
Recordings

- **PC folder with the [PCFiles] identifier**,
  e.g. SmithJoh_220311134555[PCFiles]

  The File Manager assembles the PC files into
  this folder.

PC
Recordings

File Manager (continued)

Following Stop Recording, the File Manager steps are as follows:
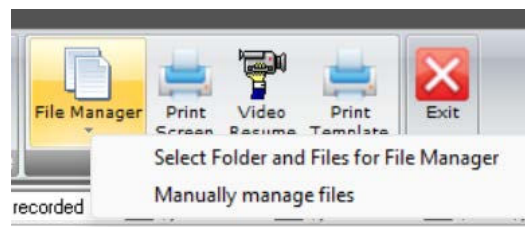

File Manager (continued)

Note: The File Manager can be launched from the main File tab as well as automatically at Stop Recording. The options available here are as follows:

Either

- Proceed as above for the last patient recording

Or via the drop down list:

- Select folder and files for File Manager
- Manually manage files
